Now, unless I misunderstand, it sounds like our "respective managers" will be discussing the lead issue. After our last emails, I was under the impression that CK's mgt would be talking among themselves.....

Edward Als, Remedial Project Manager  
NY Remediation Branch

Subject: Std Chlorine Hackensack River RIWP

Ed, attached is the draft NOD for your information. I will also be sending you DEP's comments on the December 2008 Supplemental RIWP for the on-site portion of Standard Chlorine. As you requested, I will not issue these comments formally until our respective managers speak about the lead issue.
